### **Waterborne Concrete Sealer**

#### **The Muralo Company**

Muralo's Masonry Shield is a waterborne clear concrete sealer that protects and seals all masonry surfaces with a sheen that brings out the richness of the color. It is intended to not blush when water sits on it, and won't soften when covered with water for days at a time, according to the company. Low-odor Masonry Shield strengthens mortar and sand joints, prevents dusting, and protects against spalling and cracking. The sealer penetrates into the concrete with no film, so it won't be picked up by hot tires. Plus, the surface won't turn milky white when wet. Masonry Shield can be utilized as a primer under latex paints, and it's recommended for a variety of interior and exterior surfaces including basement and garage floors, walkways, masonry driveways, pavers, natural and artificial stones, stucco, brick, cement, cinder block, unglazed tile, and terrazzo.
